Dezeen Agenda features Foster + Partners' plans for "London's lowest whole-life carbon high-rise"

The latest edition of our weekly Dezeen Agenda newsletter features the approval of Foster + Partners' 18 Blackfriars Road development in London. Subscribe to Dezeen Agenda now. UK architecture studio Foster + Partners has been granted planning approval for 18 Blackfriars Road, a development that will contain two residential blocks and a 45-storey office skyscraper. The studio claimed that the project would have the lowest carbon footprint of any tall building in London. "[18 Blackfriars Road] will feature London's lowest whole-life carbon high-rise, which also aims to be the first to achieve the WELL Community Gold rating," said Foster + Partners head of studio Nigel Dancey. Manica Architecture designs glass-fronted stadium for Chicago BearsThis week's newsletter also featured American studio Manica Architecture's designs for the National Football League team Chicago Bears, a terraced London house called Oasis renovated by architecture studio Unknown Works and British furniture retailer Habitat's reveal of its 60th-anniversary collection. Dezeen Agenda Dezeen Agenda is a curated newsletter sent every Tuesday containing the most important news highlights from Dezeen. Read the latest edition of Dezeen Agenda or subscribe here. You can also subscribe to our other newsletters; Dezeen Debate is sent every Thursday and features the hottest reader comments and most-debated stories, Dezeen Daily is our daily bulletin that contains every story published in the preceding 24 hours and Dezeen In Depth is sent on the last Friday of every month and delves deeper into the major stories shaping architecture and design.
